Dear Client,

EWI Technologies will recycle/de-manufacture and asset recovery at NO CHARGE!

EWI Technologies performs environmentally friendly recycling using de-manufacturing and asset recovery. Computers, monitors, terminals, printed circuit boards, telephone equipment, and communications systems that are unusable are disassembled into component parts. Components of value are sold for reuse, and other parts are sent to certified facilities for metals recovery. All items from the de-manufacturing process are recycled. Even items with no value are recycled at our expense.

Whether you have 10 pieces or 10,000 pieces, EWI Technologies will send our fully insured team of removal specialists with all the tools needed to palletize, remove, and transport your equipment. We provide a nationwide pickup service to help accommodate all of your organization's branches. When material is back at one of our facilities, it will be inventoried, and all company identification and/or sensitive information will be removed and destroyed. A Certificate of Recycle/Reuse will be issued for each shipment.

For companies interested in good corporate citizenship, and the tremendous public relations value associated with being a "Green" organization, EWI Technologies is not just the clear choice; we are the only choice and can provide your company the legitimacy of having the finest and most environmentally responsible disposal and de-manufacturing processes in the country. We can provide all certifications regarding chain of custody and the de-manufacturing of your products.

To get started:

1. Complete the inventory list of computers, monitors, terminals, printed circuit boards, telephone equipment, and communications systems that are unusable (Excel attachment)
2. Forward inventory list to [rod.reese@ewitech.com](mailto:rod.reese@ewitech.com)

We will reply in receipt of your inventory list and contact you directly to discuss the next course of action.

Please feel free to contact me to discuss how EWI Technologies can make things easier, more cost effective, and more environmentally friendly for your firm.

Sincerely,

Rod Reese,  
Director of Business Development  
EWI Technologies
